

Service, Repair, Preventative Maintenance PM Calibration Validation of
Laboratory Equipment and Instruments throughout the UK
Specialising in Temperature, Thermal CO₂ & O₂ Mapping
and IQ, OQ, PQ & DQ Validation

We cover everything from Incubation to Storage

Here at UK laboratory services our technicians & engineers have a vast amount of training and experience on a large range of laboratory equipment appliances and instruments. We mainly cater for the Health Care, Pharmaceutical and Food Industries as well as Academic Institutions. We not only Service, Repair, Calibrate, Validate, IQ OQ PQ, but perform emergency breakdown calls around the UK and carry out PM or Preventative maintenance contracts on nearly all types of lab equipment. We also do work in the following environments, Pharmaceutical companies plus Hospitals, Universities & councils. Bio medical labs, Pathology departments, Stem cell research, Cell culture, Tissue culture, Air Quality and Water Analysis laboratories and environments.

Other area of expertise are IVF Clinics, Bioprocess Production, Clinical and Diagnostics, Lab Automation and Information Systems, Life Science, Microbiology, Pathology labs & departments, Radiation Measurement and Security, Chromatography and Mass Spectrometry, Spectroscopy and Elemental Analysis, Diagnostics and Healthcare, Environmental, Food and Beverage, Forensics Safety and Security, Police forensics, Industrial Production, Life Science Research & Pharma and Biopharma. We are experts in the IVF clinic field and cover all instruments from class 2 cabinets and hoods, centrifuges to co2 plus multi gas incubators and cryogenic storage in CBS tanks.

SERVICE

Our fully trained field service engineers based across the United Kingdom provide a quick response to your laboratory equipment breakdowns. As an addition we can offer an emergency 24-hour response, to maximize productivity.

MAINTENANCE

Our technicians also understand how important your equipment function is to you and your daily operations. It is important that laboratory equipment is regularly maintained, as this can often reduce the frequency of breakdowns and ensure maximum performance.

CALIBRATION

Calibration is offered as a single point or multipoint calibration on individual service calls or part of a service or P.M. We also offer Temperature, thermal & co2 mapping, plus IQ, OQ, PQ.

We validate many types of laboratory instruments & specialise in ovens, incubators & ULT freezers.

COMPLIANCE

To meet and mitigate risk—in both regulated and non-regulated environments – while balancing your business and lab requirements, UK Laboratory Services offers a broad array of audit-quality compliance and validation services, ranging from risk assessment and hardware/software qualification to full system validation. We are currently working towards UKAS ISO 9001 Certification.

SALES

The sales of laboratory test and calibration meters are expected to continue to grow in the coming years. The growth of the market is also expected to be boosted by the increasing adoption of automation and digital technologies in the laboratory.

We now offer a number of Instruments for sale. Please visit our website for more details.

Types of equipment we cover

- Air Injectors
- Anti Vibration Table
- Autobomb
- Autoclave Standard
- Autoclave Large
- Air Filtration Table
- Autoflash
- Autogas changer
- Baths
- Block Heater
- bv 1000 vortex mixer
- cdc air filtration unit
- Centrifuge Refrigerated
- Centrifuge
- Compressor
- Cyclon water stills
- Cytomat Incubators
- Cytomat robotic arms
- Freezers ult
- Freezers bench
- Fridges bench
- Fridges pharmaceutical
- Furnaces
- Gas changeover unit
- Grant tube warmer/heater
- Incubator co2
- Incubator multigas
- Incubator no gas
- Incubator orbital
- Incubator cooled
- Safety cabinet class 1&2
- In2 dewer
- In2 storage
- Nitrogen Generator
- Mutidrop combi
- Orbital shakers
- Oven standard
- Oven vacuum
- Pipette General
- Pipette Multi
- Plate readers
- Plate washers
- Rapid stacks
- Speedvac concentrators
- Steam steralisers
- Thermometer
- Vacuum concentrators
- Vacuum pumps
- Water purifiers
- Straw sealer

PREVENTATIVE MAINTENANCE CONTRACTS

UK Laboratory Services Ltd can carry out all types of preventative maintenance contracts for all your medical equipment. Preventative maintenance contracts are the most important part of keeping your equipment functioning correctly.

Our technicians also understand how important your equipment function is to you and your daily operations. We can set up a preventative

maintenance contract that meets all your requirements so that we can keep your equipment performing at its highest levels while meeting your budgetary demands.

For our contracted customers, we can also offer a next day emergency breakdown cover to minimize your laboratory equipment downtime.

CALIBRATION & VALIDATION

To meet and mitigate risk—in both regulated and non-regulated environments—while balancing your business and lab requirements,

UK Laboratory Services offers a broad array of audit-quality compliance and validation services, ranging from risk assessment and hardware/software qualification to full system validation, including IQ, OQ & PQ for full system verification. We also offer a full range of mapping services from 1 Day to One Month.

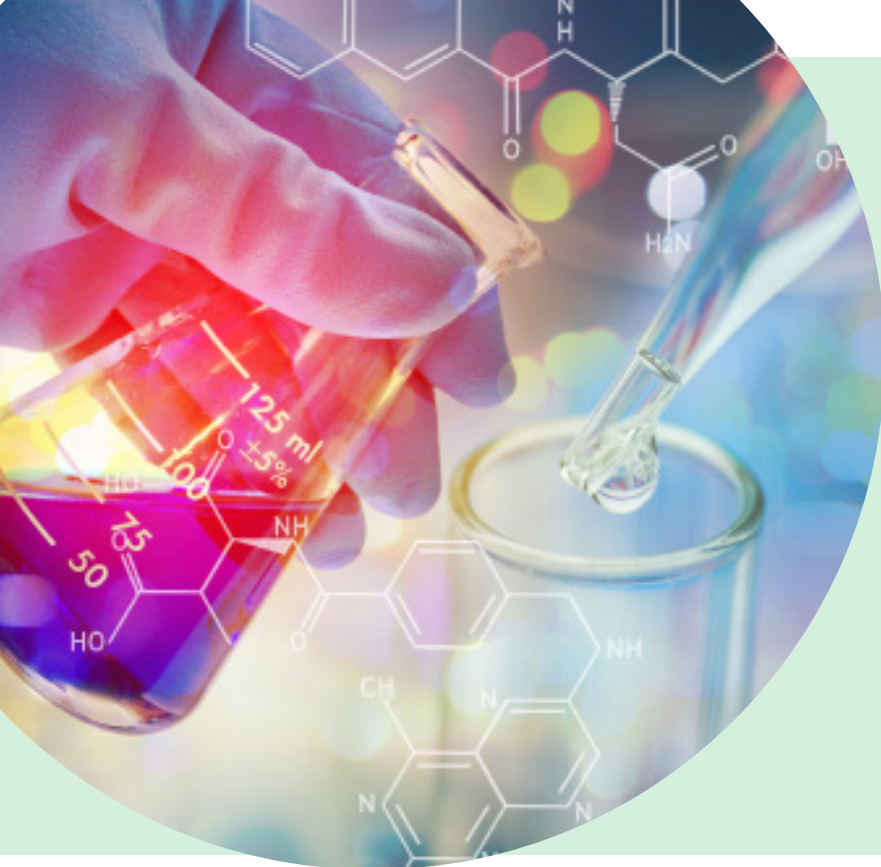

SERVICE & REPAIR CALLS

We have field service engineers based across the United Kingdom to provide a quick response to your laboratory equipment breakdowns as an addition we can offer an emergency 24-hour response, to maximize productivity. They are fully trained to the highest standards by the manufacturers of the equipment we support. produce accurate and reliable results.

IQ, OQ, PQ, DQ VALIDATION

UK Laboratory Services is able to customise and carry out all your validation requirements to cover your full range of medical equipment.

Our services include: Manage and schedule IQ, OQ, PQ, DQ for all your equipment by request, Work closely with you to solve problems and adhere to individual requests Achieve best practice standards to maintain the highest level of client satisfaction Advance notice of all forthcoming IQ, OQ, PQ, DQ visits, Post customer contact to ensure client satisfaction.

TEMPERATURE MAPPING - COLD STORAGE MAPPING & CHAMBER MAPPING

UK Laboratory Services Ltd specialise in the validation of controlled temperature units. Our engineers are highly experienced in a wide variety of equipment from Liquid Nitrogen Freezers to Dry Heat Ovens.

Our expert team will guide you through the process and recommend a mapping strategy based on the products stored and the particular storage locations.

Our field engineers attend site and complete the mapping study using high accuracy data loggers backed up with independent calibration and traceability. In line with regulatory requirements and good practice guidelines, on completion we provide a comprehensive report containing full tabular and graph data detailing warm and cold spots information.

MANAGEMENT SERVICES

Together with our service partner, IVFsynergy, we specialise in managing and scheduling the service and maintenance of laboratory equipment for fertility clinics and research centres throughout the UK.

We provide a dedicated management service covering your entire inventory of equipment, minimising downtime, maintaining regulatory compliance, and ensuring your precious time is used more effectively, rather than time spent dealing with numerous different service agents.

Manufacturers we cover

Customers we have worked for

UK Laboratory Services Ltd is fortunate to work with a wide range of clients and the following is just a small list of some of our customers we have been privileged to have worked for over the years including...

Sales of Laboratory Test & Calibration Meters

The sales of laboratory test and calibration meters are expected to continue to grow in the coming years. The growth of the market is also expected to be boosted by the increasing adoption of automation and digital technologies in the laboratory.

We now offer a number of Instruments for sale. Please on each link below to view our current meters that we can supply to your industry.

CO2 & O2 Calibration Test Meters

Temperature Test Meter

Hot Wire Anemometer Air Flow Calibration Test Meters

Air Particle Count Calibration Test Meter

Humidity Calibration Test Meter

Tachometer Speed Calibration Test Meter

Time Calibration Test Meter

Weight Calibration Test Meter

Temperature & Humidity Mapping Calibration Test Meters

Sales of New Laboratory Equipment

We are proud to recommend IVF Synergy for the sales of new laboratory equipment.
IVF Synergy is a UK-based supplier of new laboratory equipment to the IVF sector and beyond.

IVF Synergy offers a wide range of new laboratory equipment, including:

- Incubators
- Microscopes
- Centrifuges
- Pipettes
- Consumables

Knowledge Dedication Design

Sales of Refurbished Laboratory Equipment

Refurbished laboratory equipment is a great way for laboratories to save money and reduce their environmental impact. It can also be a good option for laboratories that are on a tight budget or that need to replace equipment quickly, we recommend LV Scientific if you are looking to buy second-hand equipment.

When you buy refurbished laboratory equipment, it is important to make sure that the equipment is in good condition and that it meets all safety standards. LV Scientific is a UK-based company that sells refurbished laboratory equipment. They have a wide range of equipment available, including analytical instruments, microscopes, centrifuges, and more.
